

Hunt Threats With the Largest AI-Enriched Malicious URLs Database

Eliminate them with the Best Takedown ⚡

Ensure that no threat goes undetected with the largest AI-enriched database for malicious URLs. Then, leverage the world's most efficient takedown capabilities to swiftly remediate each one, providing unmatched protection.

Fictional data for demonstration purposes.

Threat Hunting lets you explore Axur's extensive database, conducting detailed searches for credentials, cards, leaked files, URLs, and domains.

Proactive hunting to investigate and stop phishing early.

Trend research to track attacks in your industry or competitors.

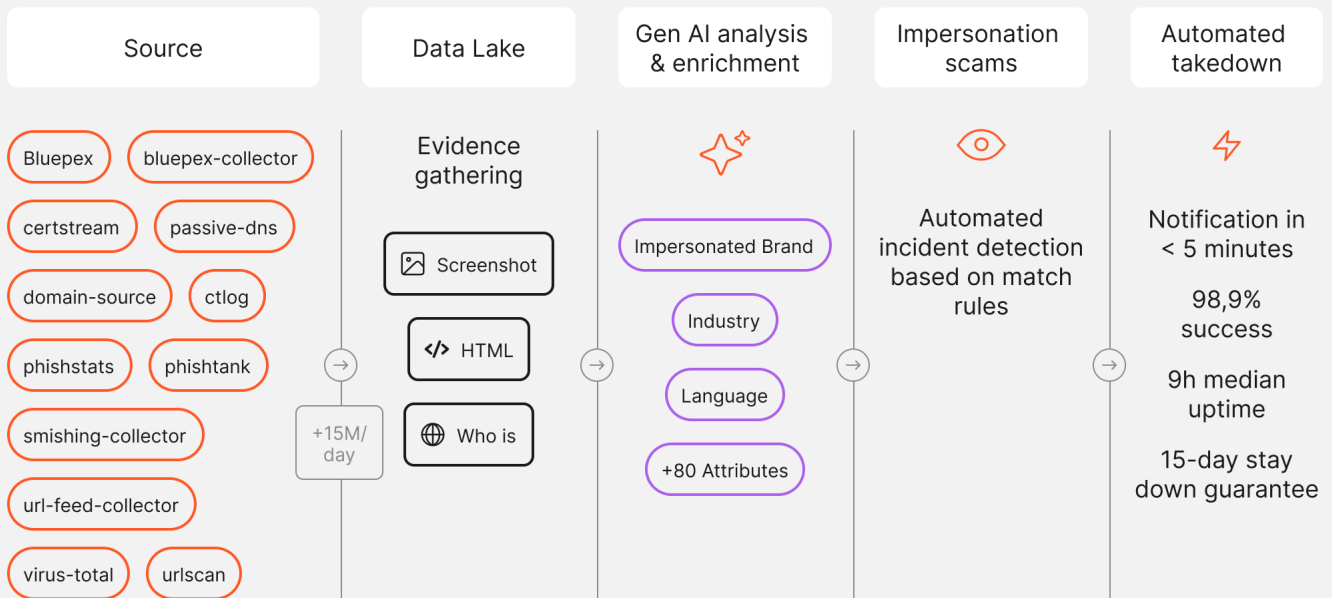

Third-Party investigations to assess vendor and partner security.

Phishing Scams Are Getting Smarter. And Harder to Catch

70% of phishing sites don't use brand names in domains, and 18% don't even mention them in text. Axur's platform detects every single one of these sophisticated threats, going beyond keywords for full protection.

A fundamentally new approach to Brand Protection

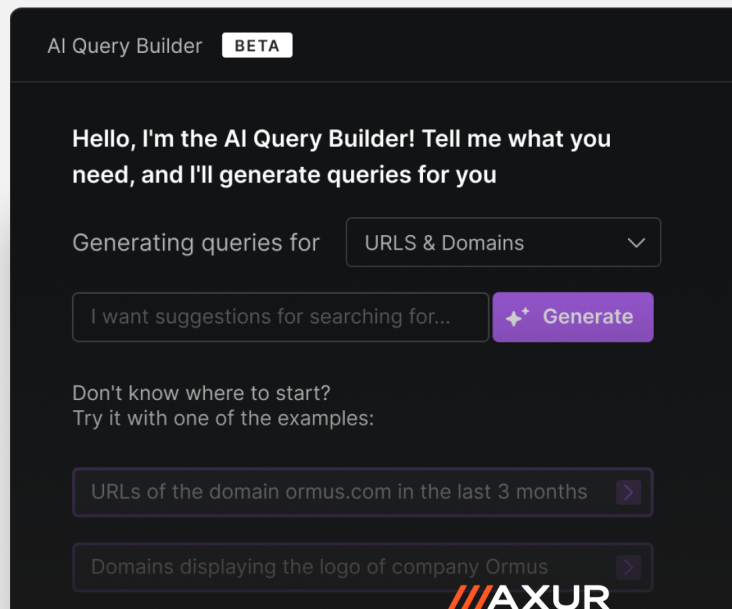

We add 15 million new websites to our data lake daily. And use our GenAI models to inspect and enrich each signal.

Leverage AI to create queries effortlessly, making threat investigation fast and easy

AI-Enriched Signals

Our AI analyzes and enriches signals across multiple attributes, identifying:

Impersonated brands 

Companies mentioned and logos 

Content type and image descriptions 

Credentials requests 

Passwords and payment requests 

Typosquatting Detection

Uncover Hidden Threats

Overcome the keyword-based limitations by identifying deceptive domain variations designed to mislead users. Axur's Threat Hunting spots typosquatting and other domain manipulation tactics, ensuring comprehensive detection of threats that traditional methods might miss. This advanced detection keeps you protected from sophisticated tactics used to bypass common detection systems.

No Language Barriers

Detect phishing sites in any language, ensuring complete global protection.
