

Threat Hunting

## Enhance your investigations with Threat Hunting powered by one of the world's largest threat databases

As cyberattacks become more sophisticated, a proactive approach is essential. Threat Hunting dives deeper into relevant incidents, helping to reduce risks and accelerate your response to attacks.

Fictional data for demonstration purposes.

Threat Hunting lets you explore Axur's extensive database, conducting detailed searches for credentials, cards, leaked files, URLs, and domains.

Proactive hunting to Investigate and stop threats early.

Trend research to track attacks in your industry or competitors.

Third-Party investigations to assess vendor and partner security.

## Discover how Threat Hunting can improve your security strategy

#### Credentials

Threat Hunting leverages a base of over 42 billion credentials exposed in data breaches and malware logs, helping you assess risks tied to vendors or customers, support audits, and prevent unauthorized access from leaked passwords.

#### Credit cards

Search for leaked credit card information to identify potential fraud risks early. This approach helps online businesses assess exposed payment data, flag suspicious transactions, and strengthen protective measures against financial threats.

#### **URLs & Domains**

Threat Hunting uncovers phishing sites and malicious domains, even without explicit brand mentions. This allows you to detect targeted phishing campaigns, monitor threat actor activities, and proactively protect against emerging online threats.

# Introducing the Al Query Builder:

Leverage AI to create queries quickly and efficiently.

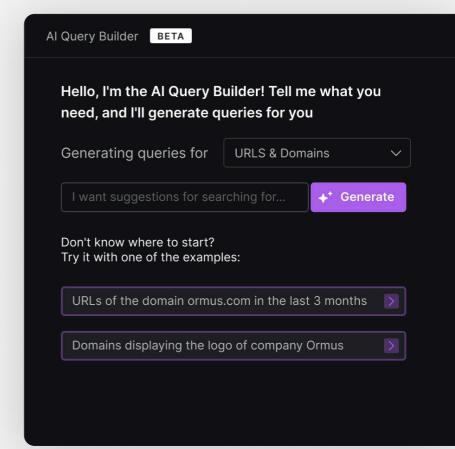

Supports:

ElasticSearch/ OpenSearch

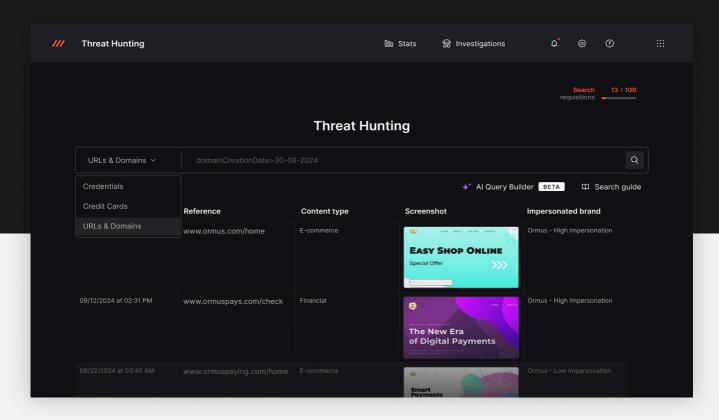

Natural language conversion to queries

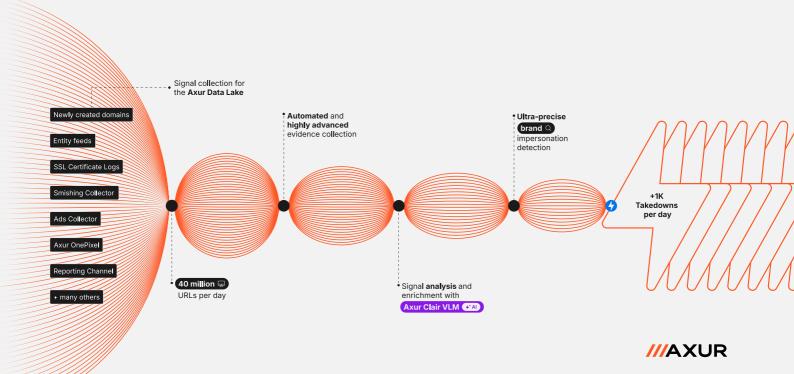

# Phishing Scams Are Getting Smarter. And Harder to Catch

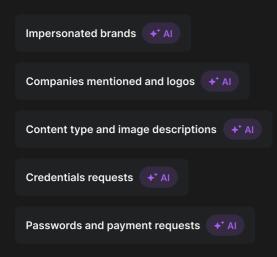

## A fundamentally new approach to Brand Protection

We add 15 million new websites to our data lake daily. And use our GenAl models to inspect and enrich each signal.

### **Al-Enriched Signals**

Our Al analyzes and enriches signals across multiple attributes, identifying:

### **Typosquatting Detection**

**Uncover Hidden Threats** 

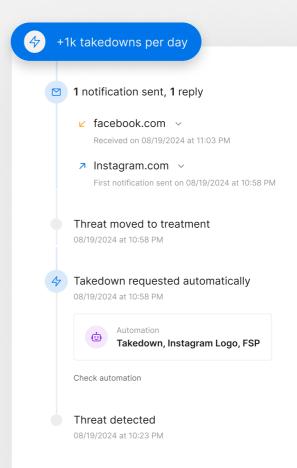

Overcome the keyword-based limitations by identifying deceptive domain variations designed to mislead users. Axur's Threat Hunting spots typosquatting and other domain manipulation tactics, ensuring comprehensive detection of threats that traditional methods might miss. This advanced detection keeps you protected from sophisticated tactics used to bypass common detection systems.

### No Language Barriers

Detect phishing sites in any language, ensuring complete global protection.

## Deтect, Evaluate and Take Down Phisнing Scams Faster than Ever

- Completely automated takedown 24×7
- Notification in <4min
- 9h median uptime
- 15-day stay down guarantee
- Follow up the whole process
- ◇ We charge only for successful takedowns
