Where Executive Trust Meets Proven Cybersecurity

For security teams and MSSPs, protecting executive data is not just about compliance, it's about reputation, control, and risk reduction.

SafeShare bridges these priorities by combining advanced encryption technology with an intuitive submission process that ensures no sensitive information ever leaves a secure environment.

What is SafeShare?

SafeShare is a platform developed by Axur to enable executives and VIPs to provide their own sensitive monitoring data without the need to share it with third parties or access the Axur platform.

Why SafeShare Exists

Executives and VIPs handle high-value information that often becomes a target for phishing, impersonation, and social engineering attacks. Traditional data collection methods, involving intermediaries or email exchanges, increase exposure and reduce trust.

SafeShare replaces those weak points with a direct, encrypted submission channel, purpose-built for privacy and assurance.

///AXUR

You're all set!

We are already monitoring your data.

Threats found will be available in your team's Axur platform.

In case of further questions or if you'd like to update your information, reach out to the security team.

How SafeShare Protects Data

End-to-End Encryption
AES-256-GCM and TLS 1.3 secure both stored and transmitted data.

Integrity Validation
Hashing ensures that once submitted, information cannot be altered.

Controlled Access
Data is processed without human intervention or third-party exposure.

Regulatory Alignment
Built to comply with Global Privacy Frameworks and Laws.

Why It Benefits Executives & CISOs

Operational Confidence
VIPscan assure leadership that their data is encrypted and protected across all stages.

Reputation Assurance
Prevents potential data leaks tied to manual or insecure submissions.

Simplified Compliance
Reduces documentation effort for data protection audits.

Executive Experience
Quick, private, and seamless onboarding with zero friction.

Empower your executives to share securely — with technology that meets the highest encryption and compliance standards.
